The Rush Is On!

Would you like a way to make money on the Internet without being an author OR programmer?

You've heard about it just as everyone on the planet has.

The Apple iPad is out and people are buying it up so fast that they can barely keep the thing on the shelves.

You have probably seen people on Twitter, YouTube or FaceBook all bragging about their new little toy if they were lucky enough to get one.

While the iPad is an extremely cool piece of technology, there's something even cooler about it...

The ability to make money selling iPad applications!

From: Your Name Here
Tuesday 11:06 AM

Dear Friend,

Unless you've been hiding in a bunker in the desert, you definitely know about the the new iPad.

The iPad has hit the market like an atom bomb and it seems that everyone is buzzing about how great it is.

You see your friends, family, or business associates talking about their new iPad's on all of the popular social media sites as well as hear friend talking about them in person or gloating how they got their hands on one.

There are constant news stories on the television talking about the new piece of technoligical beauty and how cool it is.

Many stores are sold out of the iPad so even getting one right now is hard because everyone is buying them up.

Can Apple's IPhone Predict The Future Of The IPad?

Apple has spent a lot of time perfecting and growing their iPhone product for the last several years.

The result?

The iPhone is by far one of the most popular and best selling phones on the market in spite of the hundreds of other models available.

This is even more astounding when you consider that the iPhone is one of the most expensive phones on the market!

How did they do it?

They did so with the addition of their App Store which has seen explosive growth in the last couple of years.

The App Store allows anyone with an iPhone to go download applications, games, tools, GPS services, etc. right to their phone. There are hundreds of thousands of apps out there.

This one feature has made the iPhone the success it is now.

The App Store Gold Rush Then & Now

Just as the iPhone saw the raging rush of the App Store's success, the iPad is also going to see a huge rush of applications!

CREATING
iPad
APPS
The Rush Is On!

The best part is that iPad apps are in their infancy and the market is wide open.

Just like the gold rush in California many decades ago, the gold rush in the App Store is back on.

Anyone smart enough to get in on the iPad App boom is going to give themselves an incredible opportunity at making a fortune.

The fact is, the App Store is already established and has millions, upon millions of customers.

Those are customers that you can sell your app to!

This is a pre-built, free platform for you to get your application advertised on.

Why IPad Apps Will Be Even Bigger Than IPhone Apps

Because the iPhone had to start from scratch as far as the App Store is concerned, they had to slowly grow the customer base.

That's not he case with the iPad.

There are already hundreds of thousands of applications available within the App Store for the iPhone.

This means that there is already a huge customer base ready to shell out cash and buy iPad applications.

Apple doesn't have to slowly build up the App Store because it already exists, has millions of customers and a rapid mass of people ready to buy.

This is why there's no doubt that iPad Apps will be much bigger than iPhone Apps ever were.

This also means that your application will have a huge advantage when you first launch it because you'll have an instant multi-million person customer base looking at your App!

It doesn't get better than that when you launch an application!

The IPad Has Built In, Pre-Exiting Value...

You see, most of the people buying an iPad are already iPhone owners. This means that they know the value of the iPad already because of the iPhone.

This also means that they don't need to be sold on the incredible value of the iPad before they buy.

They know, the iPad is basically a big iPhone with more features, a bigger screen, and better application potential!

This is why iPhone customers are ready to buy the iPad as well as tons of apps to enjoy on their new device.

Makes sense, doesn't it?

"Don't I Need To Be A Programmer?"

After All, I Don't Know The First Thing About Programming Or Coding Software!

There's no doubt that creating software has always required some level of understanding when it comes to code.

The good news is that through technology and incredible resources on the Internet, you can have an iPad application created for you.

And no, it doesn't cost a fortune to do this.

In fact, it can be so affordable that you'll probably feel like you're doing something wrong when you see the price.

Don't worry, you're not!

This is an incredible opportunity not only for you but also whoever you decide to work with.

Truly Capitalizing On The IPad Market...

If you want to truly capitalize on the iPad market, it's essential that you take fast action so you can get in early.

The first people to get their Apps in the App Store are the ones that are going to make fortunes quickly.

You know, the kind of fortunes that you see being talked about on the news when they analyze Internet success stories.

Many of these success stories are teenage kids that are still in high school, which shows you how open the market is.

Anyone can do this!

You don't need to be a computer science graduate, you don't need to be computer wiz by any means.

You just have to posses the foresight to act fast so that you can be in that first wave of iPad Apps that people see.

You and I both know that when something new comes out, the iPad for example, the first accessories, applications in this example, sell extremely fast.

"Can I Really Be An IPad App Developer?"

As I said previously, it doesn't matter if you don't know anything about programming.

Sure, if you want to make money with iPad App's, knowing what an iPhone is and how it works, knowing how an iPad works, and having a basic knowledge of basic computer skills will be helpful.

Other than that, you just need the determination to create an income on the ground floor of the iPad App boom.

That is really ALL you need!

Do you have it?

Are You Ready To Cash In On IPad Apps? Exploit The IPad Boom And Be One Of The First Big Time Success Stories!
