## SUSPENSION AND STEERING

### Front Suspension/Steering Articulation Caps

Every 12 500 miles or whenever underbody inspections are carried out, check the condition of ball joint rubber caps.

If they are damaged, replace. The new caps should be packed with **grassofiat MR 3** prior to their installation.

At the same time inspect ball joints for excessive play. If evidence of looseness exists, replace the ball joint.

Proper joint maintenance is essential for car safety.

### Front and Rear Suspensions

#### Every 12 500 miles

Check rubber mounts for proper efficiency and fasteners for tightness.

### Front Wheel Bearings

#### Every 25 000 miles

Adjust bearings and lubricate with **grassofiat MR 3**.

## TIRES

### Every 300 miles or weekly

Check pressure with a gage (see page 52) not forgetting the spare wheel.

Make sure pressure is exactly the same in each pair of tires. In hot climates, do not reduce pressure as this would only increase tire temperature.
