Introduction

Welcome to this guide which can help to cut through all the hype and help you really start making money online!

I know that sounds like all the hype you usually hear, but this is no normal guide, this is about making money in a way that most people do not discuss, because this involves working for your money...

Most people online are trying to sell you systems where you make money without any work, they promise you 'can literally copy and paste and its guaranteed to generate FAST cash' (seriously I received that in an email this morning!). But then it turns out to be junk. Now I know that sounds ironic when the subtitle on my site is 'How to conjure money out of thin air'... but I didn't say you just had to copy and paste and do no work!

This is a different kind of system, something that requires hard work but can make you money starting quite literally today!

So why freelancing? Well more and more people are coming online, and more and more people are starting online businesses, which means more and more people need help to run and grow their websites.

There are a whole range of different things you can do, and as the internet is so big then it is not like a small town where one person has a stranglehold on all the business, literally anyone with a bit of strategy can section off a nice list of clients to keep them busy.

In this guide we're going to discuss exactly the kind of things people need doing and how best to go about doing them, how to market yourself and look like a pro, the steps you need to take to get those all important first clients, how to take payments (important!) and then how to expand and get past just swapping time for dollars.

Hopefully by the end of this guide you'll have a clear idea of the direction you want to take and you can get out there and start working, getting the first few clients is nerve-wracking, but after that it gets a lot easier!
