IDENTIFICATION OF F3P ENGINES WITH REDUCED CUBIC CAPACITY

ENGINE	APPROVAL LETTER	NUMBER	VEHICLE TYPE
F3P	E	704	X53 Y
	H	706	
	E	708	
	H	760	
	H	706	053 A
	H	760	
	J	765	053 B - F - H
			X53 V
	A	682	053 C - D - H
			X53 8

Definition of identification X and 0

X53 Y = **B53 Y**, **C53 Y**, **L53 Y** Vehicle type code starting with a letter.

053A = **353 A**, **453 A** Vehicle type code starting with a number.

The reduced cubic capacity can be identified using the type approval letter (B) on the engine plate.

- A** : the engine type
- B** : the vehicle type approval letter
- C** : the identity of RENAULT SA
- D** : the engine number
- E** : the engine manufacturing number
- F** : letter indicating the factory at which the engine was manufactured (e.g.: C for Cléon)

LOCATION OF THE VEHICLE IDENTIFICATION PLATE

Position n° 1

Plates (A) and (B) may be separate or on a single plate (according to specification).

Position n° 2

Plate (C) is located on the front panel.

Position n° 3

Adhesive plate (D) is attached to the chassis on the side of the right front door.

METAL PLATE (Position n° 1)

Rectangular plate

This consists of;

- At A** : the manufacturer's name,
- At B** : the EU official approval number, including:
 - At B1** : the number of the country granting the EU approval
 - At B2** : the approval number for the vehicle type.
- At C** : the official type number preceded by the manufacturer's worldwide identification code (for example VF1 is the code for RENAULT France),
- At D** : the chassis number
- At E** : the gross vehicle weight,
- At F** : the gross train weight,
- At G** : the maximum permissible front axle weight,
- At H** : the maximum permissible rear axle weight,
- At J*** : the vehicle model year or paint identification code.

* **NOTE:** some of these items of information are not required for certain export markets. The plates described above are shown in their most complete form.

Oval plate

This consists of:

- At 1** : the vehicle type
- At 2** : special features of the vehicle*
- At 3** : the basic equipment * (see table),
- At 4** : options,
- At 5** : the manufacturing number,
- At 6** : the vehicle model year* or paint identification code*,
- At 7** : the factory at which the vehicle was assembled:
 - A** : Portugal
 - B** : Batilly
 - C** : Creil
 - D** : Douai
 - E** : Spain
 - F** : Flins
 - G** : Grand Couronne
 - H** : Haren
 - J** : Billancourt
 - K** : Dieppe
 - N** : Mexico
 - P** : Mexico
 - Q** : A.M.C.
 - S** : Sandouville
 - T** : Matra Romorantin
 - U** : Maubeuge
 - W** : Spain Valladolid
 - X** : Heuliez
 - Y** : Yugoslavia
 - Z** : U.S.A.

* DEPENDING ON COUNTRY OR SPECIFICATION

SPECIFICATIONS VEHICLE IDENTIFICATION

01

METAL PLATE (Position n° 2)

This consists of:

- At A** : the manufacturer's name,
 - At B** : the EU official approval number
 - At C** : the official type number preceded by the manufacturer's worldwide identification code (for example : VF1 for RENAULT France),
 - At D** : the chassis number,
 - At E** : the gross vehicle weight,
 - At F** : the gross train weight,
 - At G** : the maximum permissible front axle weight,
 - At H** : the maximum permissible rear axle weight,
-
- At 1** : the vehicle type,
 - At 2** : the first number indicates the gearbox or the factory options
the second number indicates the level of equipment,
 - At 3** : the technical equipment number,
 - At 4** : the factory option additional equipment,
 - At 5** : the trim identification code,
 - At 6** : the paint identification code,
 - At 7** : the level of equipment,
 - At 8** : a letter indicating the factory of manufacture, followed by the manufacturing number.

WARNING: The 7 characters of the manufacturing number must not be separated. For vehicles manufactured before that date, the manufacturing number is 7 numbers.

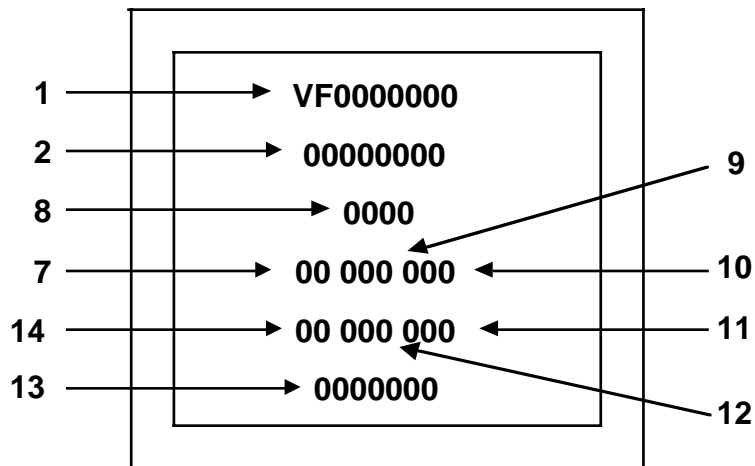

NOTE: some of these items of information are not required for certain export markets. The plates described above are shown in their most complete form.

METAL PLATE (Position n° 3)

SPECIFICATIONS

Vehicle identification

01

This consists of:

- At A** : the manufacturer's name,
- At B** : the EU official approval number
- At 1** : the official type number preceded by the manufacturer's worldwide identification code (for example : VF1 for RENAULT France),
- At 2** : the chassis number,
- At 3** : the gross vehicle weight,
- At 4** : the gross train weight,
- At 5** : the maximum permissible front axle weight,
- At 6** : the maximum permissible rear axle weight,
- At 7** : the first number indicates the gearbox or the factory options
the second number indicates the level of equipment,
- At 8** : the vehicle type
- At 9** : the technical equipment number,
- At 10** : the factory option additional equipment,
- At 11** : the level of equipment,
- At 12** : the paint identification code,
- At 13** : a letter indicating the factory of manufacture, followed by the manufacturing number,
- At 14** : the trim identification code.

NOTE: some of these items of information are not required for certain export markets. The plates described above are shown in their most complete form.

ALLOCATION OF THE TECHNICAL EQUIPMENT CODES

The equipment code, three letters at (9), must be documented when vehicle identification is required (ordering of replacement parts, warranty form, etc).

SPECIFICATIONS

Vehicle identification

01

Due to the European depollution standards, the "ABCD" coding of some vehicles has become saturated following the introduction of new engines (letter "D"), the body code "A" therefore becomes "A'".

	A	A'	"ABCD"		"A'BCD"
3 door hatchback	C	3	C53A	or	353A
5 door hatchback	B	5	B53A		553A
4 door saloon	L	4	L53A		453A
Utility	S	6	S53A		653A
Cabriolet	D	7	D53A		853A
Renault 19 all models	X	0	X53A		053A

The engine letter "D" at A in both cases corresponds:

- to engine E7J 700 when the body type is **B, C, D, L, and S**
X covers **B, C, D, L, and S**
- to motor F3P 706 when the body type is **3, 4, 5, 6 and 8**
0 covers **3, 4, 5, 6 and 8**.

Therefore

- B53A** : Renault 19 5 door hatchback with engine E7J 700
- 553A** : Renault 19 5 door hatchback with engine F3P 706
- C53A** : Renault 19 3 door hatchback with engine E7J 700
- 353A** : Renault 19 3 door hatchback with engine F3P 706

REMINDER:

"A" or "A'" = body type
 "BC" = N° of project (example 53)
 "D" = Engine number

LIFTING EQUIPMENT

Trolley jack - Axle stands

02

Safety symbol (special precautions to be taken when carrying out work).

ESSENTIAL SPECIAL TOOLS

Cha. 280 -02 Trolley jack pad

Cha. 408 -02 Trolley jack socket

Suitable axle stands must be used when using a trolley jack.

It is forbidden to lift the vehicle by taking the load under the front suspension arms. Use whichever of the sockets **Cha. 408-02** that suits the trolley jack to fit pad **Cha. 280-02**.

LIFTING WITH THE TROLLEY JACK FROM THE FRONT

Apply the handbrake or place chocks under the rear wheels.

Use pad **Cha. 280-02**.

Take the load under the front sub-frame.

Avoid the pad touching the gearbox or the exhaust down-pipe.

For some vehicles, make a notch in tool **Cha. 280-02** to prevent it touching the exhaust.

LIFTING WITH THE TROLLEY JACK FROM THE REAR

It is **FORBIDDEN** to lift the rear of the vehicle taking the load under the rear axle. Lift each wheel separately taking the load under the vehicle jacking points.
